Unique Yamaha often called a "Euro-Virago". Served me very well until I bought my Harley. Original owner, clear title. 19619 miles. In good shape, but needs a battery, some cosmetic attention (aluminum polishing) and the headlight/instrument cluster lights currently not working due to a short in the dual grounding system. No rust or dents on the tank. One cracked mirror. Good tread on both tires. Have some oil filters for it as well. Great Spring project with parts still available on EBay.
